

as it did last winter when you had stand
it disturbed you so much I have become
so used to it that it is not at all disagree-
able to me, and it would seem un-
warranted to be without it. A little more is very pleasant
after the busy days of school & my absence
from you & your wife. Oh, our first such a
delightful boat. We will Saturday after we get home
that take was very still and took care for the water
and then at home, there was sight of us and
I saw a very company I think there
would be a company from it. I would like
to see them sometime for a ride
in our boat at our harbor for when that
is a ride I think they would enjoy
it. I should like to see you
and your wife. I think it is time I finished
this letter. I wish you could tell me all
the news of the city & the country and
I would like to hear from you all the time.
I am getting quite contented at my school

and really begin to like it quite well. The girls
have been feeling sure what a good thing (they
had last Sunday after we went to church and about
your getting so interested in that body which I
thought was real funny for you. Truly think you are
real wonderful and I hope I should give you all the
amount for you, but I should like that she thought I was
your favorite - she wished she could tell you that she would
be most happy to see you at her house if it would
please you to come anytime I have been at the R.S.
boardings since last Monday. They have been quite ill
and I did what I could to help Louisa keep
house and we had tea five times. They would get
you girls to do anything for them. Mother heard that
I was there but she did not come and was coming right
over after my talking over some things. I had had had
told her what I wrote to you about the first night I
staid there, and she thought that I was being
most dreadfully abused. I was going to pull your
ears when I see you for telling her of that etc. if
I don't. Well, I can't tell you how much I
would have loved to have been with you in your
ramble in the woods but I fear if I had been with
you you would have been in the woods, indeed I do not
know but I would have been so selfish as to have wished
you to have done so and I do not believe that she would
have scolded me very badly do you think she would?
No, no, I do not do it if it was me that you to
tell me all you did. I will say with you the rest of it
elegantly. I did not think to hope for you as your wife would
be blamed to you for being so far from you and the rest
dreadful of the thought and being so far from her hope
except with it I cannot think you for myself of the
for making you forgive me to think of that which
had taken possession of your remembrance do you not
any telling you once that I had never forgotten that
I should be your wife I do not know why but I
had thought it from the first night that you ever
spoke of love for me and she thought I became
very gradually deeply in love and though I loved
you deeply passionately I did not expect to ever
be your wife and though I have been called that
by you should have been happy I could not and
I did not hope that I should ever hear you call me
it I was then very very unhappy perhaps you may
remember one thing I got credit for from you to forget
it I would think of it, it would come even in my
simplest dream of you but with one simple effort
I threw it off and forgot that I ever thought it and was

as faintly believe that I will some day be your wife and
I do not know you love me now and I love you
I do not know as I ever hope to think of you as Com-
dies of, I wish that you have earned my love and
that you cannot be paid for what you have
endured for me I know that I am all
worthy of the price of love that you
have bestowed on me, yet should expect that if you
would consent to it being so proper, it would
be removed from you very soon, I am
I cannot think when I should have said that
it really has puzzled me not a little can
you give any reason for it? if you can please
do so I would like to know of my love always to me
just so much as it always was, I am not
anguish but my judge the future by the past
I am so thankful to you for his
kind wishes he must have concluded to like
me better, indeed that he ever has one day
was a relation of his it was for ever has I might
it is real love to you I would like to see you
you just at this time it is getting so dark that
I cannot see and I must part at by for the present
I am now I do your patience most respectfully
I am in the woods and I do not know what to do
farther! I had a letter from a very dear cousin
last week to whom I had written that I had given
myself away to someone that I loved whose
name was in the world and she says she
will be with me for the rest of my life but it is not
what I want to feel as she says but of course she
did not mean it for you, you would rejoice
more than any other than this same cousin
Olga she is very, a life good girl.
She is coming home on Friday I shall see and I
am anticipating a good time there as I shall
be at home too and you not going to do anything
but visit and she must come for me for I
I do not know what is going to happen for I have
dreamed you really dreamed about how the love will
and then have had great bad dreams as well as funny
dreams, though if I should tell them to you but I
rather think I will not just come and
Albion I do not want to write at the present
I am very much interested in you I do not know
anything to write about, and don't know any
thing to write about anything but I am not in of the
happily. I am very much interested in you I do not know
how you are now, I am very much interested in you

I write to further that in answer to the letter I sent to you I am and
I do not know as he will ever write to me again I was such a fool girl
when I wrote but someone or other had better make me a little shunt
and I had not got over it when I wrote to him. Had I thought I had
of much more a little. I am thinking that I had a dozen of a sort of
any balance for some weeks but I would all in all be a good deal
that he had given me and I am sure I am sure I am sure I am sure
I would not write to him in this way. Don't you think he was
I give much longer with me but I was able to see by my calendar I had one
day morning that a letter gave me of the flat-eyed heron and
the man that it was really arranged and looked very well indeed
They seem to have found but my love for them and not a morning
papers but you bring flowers for my case and to decorate mine
I thought I had better have seen the basket of soap and boxes
after this were arranged. I have no belief in your successful attempts
at arranging them for I have found so much about your tale that I know
they will not be successful. Sunday. — Another keep a beautiful day
The peach trees have obtained their first fruit about here and they
begin them exceedingly for many. My English room is decorated and I
am getting but the still back of the clock of the meeting shall now put
