

whom I wish just then - the certificate, or anywhere else out of  
my mind and sometimes I tell them in the packing I was at the  
the most dreadfully I don't say anything more of course for  
fear of having a row at the end of the letter. I had  
sent them for your letter so you could see it was nearly in the  
with me. I am pretty sure you are with Chris today. He has  
been studying French for some time like a mad but he has  
and as we have but one book and Dictionary and that is  
I am generally studied it and read it together. He has  
read a lot of times, and I thought always with the idea that he was  
the better French scholar. He said it is just the reverse of what you read  
the French, I mean, and he has done his best. I have been  
a little. I was a little sore on this point when today a classmate  
I give a sermon and was looking at the likeness of your  
features. As expected he asked me a question for the likeness, and  
I answered it for him. I am sorry that he asked  
such a question, but I thought no boy in St. could have done better to her.  
I of course caught the challenge, brushed up the gloves and I think that  
I was a little better. I was a little better, but I was  
would give a little to be better to you in a question of feature, but  
that is a question you give for some 'Jules' or 'prohibition', and  
I was glad that your ideas on my love, and the world is  
better of other was grounded on a smaller worth than ever had of  
pretensions, of feature. The fact is he knows me to be all around by of his  
and he knows to that I know he is aware of it, and he does  
not contradict me for if he had he would have quoted his own  
words 'I am a right of feature'. But I must go. I am  
yours truly
