

Concord, N. H. Jan 30<sup>th</sup> 1868

Sunday E. M.

My dear friends,

I have just taken  
my accustomed Sunday walk, and  
I have seen and seen as needs be.  
Angie has been saying that she cannot  
recall that we are married. I told  
her that I told her we would realize  
it, when we go to bed together  
she did not know about that even  
now. I told her, as she had to then  
send me to my room to your room,  
and I was sure that after she had gone  
to sleep, that it would be nothing  
at all. I thought then if she knew  
more than what she saw, she might  
think that it was some body's fault  
as chance was. I saw she thought  
she did not have been very cognate  
then I saw sometimes thought that  
Angie could know that anyone else did

of us, but she loved and needed us too. How and I think I will finish by  
finding to imagine that anything we could do if she can be there at the open  
de. was wrong. She is such a dear ing. She is delighted at the prospect  
good sister. I think she is even so. Her long anticipated going to school  
much younger than I am. Mrs. Crank has been here all day  
and she has been almost incessant with her baby. It is such a curious  
thing to see glowing features and a little voice, but I did not feel  
baby's feelings as though she had serious one bit. Now and I wish  
she could be here. I am so glad - It is not a boy or I might  
think and it was a very beautiful fear not have dared asked the question  
there, but our whole household is now I have some nice warm socks  
and some "Sue's" as she did. Quilt and some good rough towels  
The jobs are all at home today hemmed and mended, ready to send  
and we had such a nice time to you if an opportunity should occur  
this morning they have given us much too. Mother says I may stay all the  
the afternoon. I do think I have the work I want and I don't mind  
best sister, but a year over road. but I must submit a key with each  
June commences school in C. with for next winter. I am thinking you know  
the next term she will be a year in one of my numerous accomplishments  
if she can find in a school. My parents I don't think I see that  
two terms at least. Her times I will follow you with any and all  
school will not close before until for the future disposal of myself, until  
two weeks after its commencement. I come to some definite conclusions
