

The first part of the letter is
on the first page of this sheet.

Sunday, night

My Dear

I have just finished
a letter to Father. I thought I would
open a sort of semi-annual corres-
pondence with him if he wished. I don't
know how he will like my letter but what
I have written I have written."

In your letter yesterday I thought
I would write a few more lines and
the letter out in the morning. I don't
think I ought to write any more for I fear
you are getting tired of long letters you send
me such abridgement ones. I think I
shall regulate the length of my letters here-
after by that of your own you cannot
surely complain then. Please never tell
me again Love that you would have

delonged writing but you know I
like to hear from you frequently. I would
rather you would defer writing for at
least four weeks. You write sincerely
because you must. Do not care if
you delay until Sunday every week
if it would be more convenient for you.

Write just when, just as much, &
just as often as you wish, and when
you don't feel like writing to me don't
write. I am so sorry you were dis-
appointed in not receiving a call from
us. Since ~~that~~^{on} Christmas Eve, I
would have loved to ^{have} dropped in there &
seen you with that success. I must needs
write a long account that because I have
practiced them sometimes but forget where
the papers are, I am sure that I
will not have any inclinations, at all
when I hold you, what I wished you
to study, for I don't believe you had
ever told me there before. I was quite in-
earnest however, as was which you

have probably read since then
will seem to show in fact I don't
think you had better spend much of any
time in studying Geometry. Indeed
I have half a mind to say that if you
venture beyond the 6th book of
Legendre, I will never admit you to a
share of my best secret board. Why if I
should ever hear you talking of lines & cor-
angles & Triangles, Spheres, Spheroids, &c,
I am sure that I ~~should~~^{would} conceive an
unbearable and everlasting dislike
for you. I am however maintainant &
I don't want a triangulated mono-
nomial for my wife; so just throw
inside your mathematical longings &
when you study anything study modern
languages and Music. Will you not try
I am, your very sub? In other respects I
wish my wife to be My Emma - the
Emma that showed even and love,
the problem of her heart unsolved

by all but some of the wealth of the world uncompromised
always a positive, consistent generosity and never negative
or reactive.

Here you are on mathematical terms, so
just transferring are yourself to the right. The equation
I gave appears it would be correct with my wife.

There do seem silly enough once I saw it. I have said
just might be a good name for my business, never from
had already organized mental from of power.

P.S. I am very sorry William's flowers were wilted, perhaps
the loss may be repaired tomorrow. I know how
such a really trivial loss will effort strike upon the
heart. It is almost like the death of a dear child from it.
I am for a kiss of consolation on my account, I
