Dear Madam, -

We have your card of September 24th in reference to the Sober Paragon Sweet Chestnut; and we are very glad of the opportunity to send you under separate cover, a copy of our booklet, which will supply such information we believe as you may require.

We regard Fall planting as preferable to Spring; because Chestnut Trees start to grow very quickly in the Spring, whereas in the Fall they are perfectly dormant, and that is an ideal time to transplant.

We have left, but a limited quantity of trees; as the demand has been very heavy, and we have been compelled to discontinue our advertisement. Should you think favorably of placing an order with us, it would be well for you to send in same promptly to ensure you getting what you require.

We had confined our offering to one grade, three to five feet; but owing to the unparalleled drought, a portion of our trees have not made the growth they would under average conditions; hence we have another grade that will run from two to three feet. Beautiful trees, same age, well branched and just exactly as good. We are quoting for this grade, \$18.00 per 10, \$150.00 per 100, \$1250.00 per 1,000. These prices include packing and transportation charges to destination. Harvesting at the grove will commence the first of October, and we will then have samples of the nuts to send you. The product of the orchard this season is about 5,000 bushels. This entire product has been sold at \$6.00 per bushel. This will give you some idea as to the merits and demands of the Sober Paragon Sweet Chestnuts.

Thanking you for the inquiry, and hoping to have the pleasure of supplying you, we are

Very truly yours,

GLEN BROTHERS, INC.
