

Tuesday 3. p. m.

Homeopathic Hospital. Pitt.

Dear: My hand is less stiff today and will try to write. Yours of yesterday 1 p. m. came this a. m. It would be nice to have Aunt Bessie & Grace rent the apartments - Today is quite clear & warm, they say, though yesterday was cold and blustering. Minnie Keyes came in to see me & she had a nice visit. Later Nellie came in a minute & brought a bunch of claffovils. Carrie brought me a pot of primrose Sunday, & Saturday evening Alice sent up a lovely bunch of carnations & ferns. Got a nice letter from Meda

Thu a. m. She says she is all ready to start - with you please with a nice letter to Mrs Harry Cummings. Jo. Maxwell Hall, Rom. N. Y. ? Just tell her about me, etc etc. Please don't forget to call on Mrs Cornelia Worthington at the graftin - and ask her to tea. Please give my love to Aunt Bessie and say I am sorry she was not feeling well & hope she is better now. As for my condition, there are no marked changes, except that I sleep, every night, from 7 to 9 hours, and sometimes

a good nap by day. This  
relieves that awful strained  
feeling due to insomnia,  
but other wise I have just about  
the same aches & pains  
which are protean, and  
come & go without reason.  
Perhaps the crises are not  
so severe & stubborn. I  
try to sit up - recline  
rather - every day for  
a minute or so in the  
revolving chair, while the  
bed is being changed,  
but the result is not

encouraging. The doctor  
doesn't vouchsafe any  
comments. My pulse &  
temperature have been all  
the while - pulse -  
76 to 82, temperature, 97 to 98.  
in spite of everything. Dr Mc-  
Clement said he would have  
another analysis tonight  
It is so painful to write that  
I will stop. Mrs Murson  
felt the same. Did you never  
hear from Taylor about the  
story of "Piccadilly"?  
Lots of love, dear. Try to have  
a good time, darling  
M. J.
