April 11, 1911.

Mrs. Emma K. Tourgee,  
Mayville, N. Y.

Dear Madam:

We are very glad indeed of the opportunity afforded by your esteemed favor of the 9th inst. to point out that Sanatogen is not a mere stimulant, hence decided results can hardly be expected from its use for a week or two. It acts in a gradual, cumulative manner, but when taken regularly and persistently in accordance with directions, seldom fails to produce benefits described in our literature.

Of course, your years may act to delay permanent results, but the experience of Mr. John Burroughs, who we believe lacks but a few months of 80 years of age, must encourage you also to look for satisfactory results with our preparation. We invite your attention to Mr. Burroughs' letter in the enclosed folder.

Of course, we do not attempt to give detailed medical advice, and it would be inadvisable for us to tell you what, if any, form of strychnine should be used. In this we urge that you be guided solely by the directions of a competent physician. We may say that there will be no objection to the use of a strychnine mixture with Sanatogen, but as the best results with Sanatogen are to be expected under the direction of a physician, he will be the best judge as to what, if any, other remedy should be used.

We thank you for your courtesy in giving us the names of the medical men mentioned, and have communicated with each of them today.

It will interest us to hear from you again when a more thorough trial of Sanatogen permits you to express a definite opinion.

Very truly yours,

THE BAUER CHEMICAL CO.

By

*F. W. Hehmer*  
Resident Manager.
