

4438

House of Representatives U. S.,

Washington, D. C. Feb. 6, 1890.

Hon. A. W. Tourgee

Mayville New York

Dear Sir:

I enclose
to you for criticism and suggestion
the same educational bill I intro-
duced in the 48th Congress which
you then approved, in support
of which you sent several bound
volumes of petitions, the bill having
in view your plan generally,
and containing your suggestions
as shown by an article in the
Century which I copied into my
report to the House at that

time. As the House was then Democratic
(and has ever since been till now) there
has been no chance to do any thing,
as all bills have been suppressed
in the Com^{tee}. Now it is otherwise,
and we propose to have rules that
will give us a chance for the con-
sideration of this great question,
and I would like to have your views
and suggestions on this question,
and on this bill.

Very respectfully
Joseph D Taylor
