Let me know the #
of the steel you want
to the yard. I have had great
difficulty in getting
the proper thickness of steel
J. W. L.

Dear Sir

Your favor of the 10th inst., containing two propositions for granting me a License to manufacture Steel Branching under your patent, has been received. I will gladly accept one or the other of them.

Which of the two will be the best, will require some little time to determine.

I will proceed to make some samples and find out what there is in it and see if the trade will be likely to buy them; and if favorable indications are apparent, I will then notify you of the result of the investigation and ask for a formal right to manufacture.

As to the "restrictions" I will be glad to know your views on that point, as to what you would require, in the usual time?

I will look into the matter of the first, and you may mind terms for them - Yours truly, Maria Chambers
