March 7th, 1892.

Hon. A. W. Tourgee,

Mayville, New York.

Dear Sir:-

Replying to yours of March 7th will say that the enclosed pedigree of Sinclear is correct. As you say, he is the sire of a class of roadsters that have never been beaten, as a class, in this country for soundness, pluck, endurance, and intelligence. None of his colts have ever been trained for track purposes except the little ~~one~~ we trained the white faced mare that Doctor Brendergast owned, and she could trot as a three year old in about 2:50, which was considered very good in those days. I have always believed had she been trained she would have trotted in 2:30, or better.

Your mare is the only Sinclear mare bred to Kernan. I have a grand-daughter of Sinclear, sired by Mambrino King that we may, perhaps, be able to mate with Lollard one of these days. I am glad to hear that he is doing so nicely and is so satisfactory to you. Hoping to see him the first time I am in Mayville, I am,

Very truly yours,

*Frank E. Shaw*
