

Province of Ahrave, just point of the Portuguese coast Arracajine

In 1713 the said Shimadil took out the bread of sack in the Orient.

navarre Africa and by that means led up the famous water of the might other contains or success. In short he determined to circum-

the crown of Portugal whatever advantage of power and wealth it contained which he not only determined to conduct but to live to

tion before he had arrived at unhood, turned his attention to this No doubt his father's wars in Africa in which he had won glorious

example here of rebellion against without risk of annihilation. Only in conflict with the Lord and the Emperor was there any less

offered little hope of success but have every promise of extinction maintain a solid base for embroilment under such conditions not only,

base was to mistake their own borders on every possible pretext. and surrounded with wealth and justice in the hope of some day

how such in the mountains on the one side, the sea on the other, and of raising to the rank of a first class power the little king-

King. He no doubt satisfied the impossibility of not the impossibility

Personal

Handwritten notes in cursive script, including the word 'Personal' at the top. The text is highly overlapping and difficult to decipher, but appears to be a personal account or commentary related to the printed text above. It includes phrases like 'I have been very busy', 'I think very much of you', and 'I will try to put them out'.

2. I do not see any need of a company or other complexity about them. Why not you take and work them under a royalty arrangement by which the proceeds over and above the cost of manufacture and advertising are divided between us.

3. This would enable you to utilize your extensive "pull" with "horse" journals, etc, and only require a little extra clerical work — perhaps not even that, for I judge your work would be rather

unusually distributed at point of
time. I would have to ^{give some} ~~attend~~
^{attention} to the manufacture employees; and
might as well arrange for making
the springs and covering them
in different styles, of course in
consultation with you of course,
so that you would only have
to order them as required for
sale.

4- ~~This arrangement~~ It will re-
quire two patents in the United
States and Canada. It may not
be worth while to take them out
abroad unless you desire.

These patents will cost about \$125 a piece for both countries - that is U.S. and Canada - or \$250 for both. If taken in England, France and Germany besides, the cost will be about \$350 a piece or \$700 for the whole.

5 - If you will pay for the patents, ~~or~~ ~~either~~ for taking either course you choose, the U.S. and Canada - or the U.S. and foreign patents also - I will include in our arrangement also the blind patent. I never have used any improvements I may make. I presume also that it will extend

to other matters of similar character
as our acquaintance ~~to become~~
grows. I have about \$1,000,000, in
useful ideas of that sort which I am
willing to divide with one who will
work with me in introducing them,
but I do not want he should
make an investment on any of
them that even if he should lose
would be large enough to "estab-
lish a name," as the cow-boys say.
So I want him to begin easy and
go on letting one tunnel wash the
other as he proceeds. I have no
fear of his ultimate retrofactive
and success, though some of them
may not alone be very valuable.

7 - This arrangement would put my inventions - three patents covering all the ground - against you in = vestment of either \$250 - or \$700 - as you choose. Afterwards your management of sales goes against my oversight of manufacture and improvement; your placing of advertising against my pre = ferences of circulars and the like. We would share expenses of manufacture and each of us = advertising by taking it out of the sales.

The arrangement is simple, quiet, nobody need know its character. The results may be good

to my good, but cannot possibly
be bad enough to make any serious
loss.

If you have a mind to
try it I will prepare the necessary
papers and we will go on. If we
^{take out}
~~make~~ only U.S. and Canadian
patents we can go to work at once
when the applications for patent are
in.

Yours truly

Albin W. Louger
