

# MICHIGAN WHEEL CO.,

MANUFACTURERS OF

## Hickory Bicycles Hickory Wheels

With Ball Bearings and Pneumatic Tires,

• FOR •

BICYCLES, SULKIES AND VEHICLES.

LANSING, MICH.,

Sept. 2, 1893.

Albion W. Tourgee, Esq.,

Mayville, N. Y.

Dear Sir:-

Your letter of Sept. 1 received and contents noted.

We could furnish you a sulky with a pair of 28" hickory wheels fitted with ball bearings and a wide, thin, wooden felloes, with light steel tires, attached to the sulky in the same manner as our ordinary ball bearing pneumatic tired wheels. We can furnish you this sulky complete at \$100, and would be glad to forward same to you. We should be glad to hear further from you.

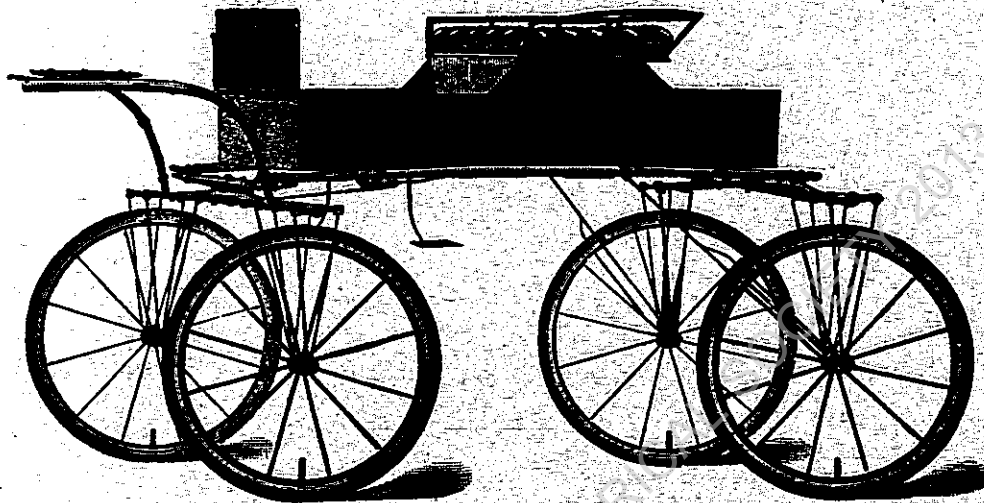

Yours truly,

*Michigan Wheel Co.,*  
*W. H. Prudden* Pres.

# MICHIGAN HICKORY WHEELS

WITH

## Ball Bearings and Pneumatic Tires

Above is cut of a Road Wagon fitted up for D. J. Campau of Detroit, to which "Guy" was hitched when he made his record-breaking mile of 2.13, July 18, 1893.

We are prepared to fit up light buggies and road wagons with these Hickory Wheels *at a reasonable price.* For ordinary road use we recommend Cushion Tires, but for first-class asphalt pavements, such as found in large cities, we recommend the Pneumatic Tires.

These low wheels are so fitted to vehicle that the height of body is not changed, and the high wheels can be substituted in their place at any time. For pleasure riding and speeding purposes these wheels are of great advantage. A horse can pull a wagon fitted with these wheels at least five seconds faster than with ordinary high wheels. There is no "slewing" of wheels in turning corners, and you can turn around in much less space than with the high wheel. Another advantage, you do not have to cramp the buggy to get in. In addition to fitting up buggies with wheels and attachments, we furnish

### THE MICHIGAN BIKE BUGGY

Which is a light road wagon, made especially for our celebrated **Hickory Wheels with Ball Bearings and Rubber Tires.**

Send for cuts, prices, and further information.

**MICHIGAN WHEEL CO.,**  
**LANSING, MICH.**

# HICKORY WHEELS,

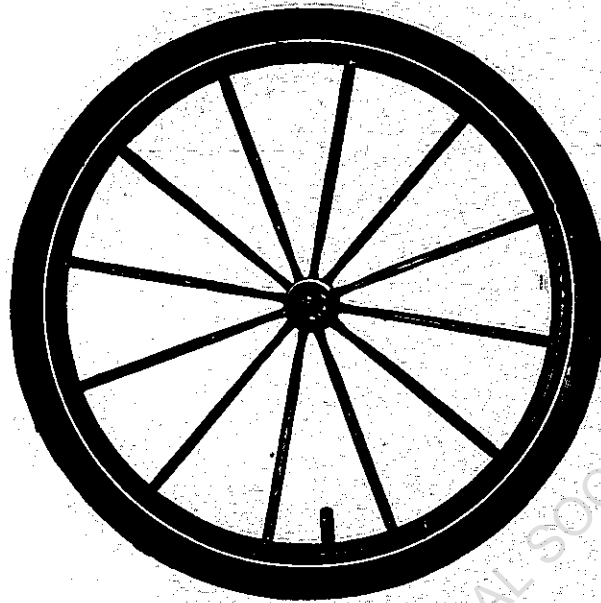

Form B.

With Ball Bearings  
And Pneumatic Tires.

## PNEUMATIC TIRED WHEELS
