Morgan Spring Co:

Gentlemen:

I return herewith the models of springs sent me. The quality is entirely satisfactory; so is the ~~shape~~ ^{and flattening} size and shape of the eyes. The bow of the spring is not exactly what I desire. I enclose a wire bent to the required ~~shape~~ form and also, attached hereto a drawing which shows the modifications ~~required~~ needed. Use the same length of wire but change the shape of the bow as there indicated.

I enclose New York draft for \$5.00
The price you quoted for 12 dozen was \$4.65.

I would order 1,000, or more, but
cannot safely do so until I have
fully tested their action as I do
not know but I may require a
heavier or lighter spring.

Please send me therefore the
12 dozen as heretofore ordered —
6 doz No 10 wire and 6 doz No 12
wire — all oil-tempered steel as
per samples —

Respectfully

W. W. T.
