U 8034

Edward Craven

Sept 16 1944

It was proved openly that the Judge of the criminal court was a participant in that atrocious crime. His own conscience would not let him preside. He had to cease staying at his residence on account of the frightful crime that encountered him. What are we to do when the officials of the law, the only power from which we expect redress, participate in such crimes. Things may change but I doubt it. I think, as long the colored race will become extinct. They will be exterminated by villainous White

Texas at that time arrested by the Chief Leader of that city. The city officials took the precaution to break in to our meeting and take away our guns before they dared to take one man from jail.

Public sentiment in the South is against the negro to such an extent that we were not allowed to speak a bit. I would rather be a Northern White man's dog than to be a Southern White man's favorite.

I am a native of this but having exposing dispositions I came to the South and stayed 1½ years prior to this outrage. I met so many people to know them

I have also had the honor of being a personal acquaintance of Miss Ida B. Wells.

If I could get the backers I would commence in her work by training in the south at my own risk.

Something may be accomplished by working steadily and untiring

God grant that a change will soon be made.

Respectfully yours in the cause

H. J. McDaniel

To Edmund

Judge Albion W. Tourgee
