Mayville - or Chautauqua. N.Y.

Dear Sir: Yours of 1st instant is received. The gabion and sand bag ended to omitted and a log substituted or a rock. You will readily see that the soldier must be handling his bayonet, or it renders it difficult to understand whether he was advancing or retreating. While modeling this figure I had little hope that it would ever be used, except as a statuette figure on a column pedestal; but if the Association is really inclined to have a statue, any modifications that are desired could be made. Ask your comrades to send me suggestions, and I will send you photographs of several different times.

Very Truly
Levi T. Scofield.
