Villenova, Oct, 12, 1894,

Albion W. Dougl,

Dear Sir,

Yours Rec'd, The horse's time this week is about as it was last week, he trots better some days than he does on other days. he seems to get excited some days, & trys to go into a pace, but it is not a good pace, his ankles crack some by driving him fast, a good many horses are bothered in that way

I think your Stallion is doing quite well, perhaps you have a trotter in him. I am interested in your "Pick up" please let me know all about how it works, wish that I had one here to experiment with,

I will keep horses & colts this Winter, & drive them what they need for ten dollars per month, J. B. Gardner
