Ans 27 - 50

Washington D C
1736, 19th St, NW,

Dear Judge.

I recd the "Historical Souvenir" and am more than pleased with it. I enclose two dollars for which please send me as many as this will buy. I want to send copies to some old pedlers part of our Rigt - friends I have picked up in my wanderings. The copy you sent got badly mutilated in the mail so that a large part of "Itinerary" relating to the March to the Sea is gone.

Under date of Oct 10/64 "Allentown" should be "Allatoona" - There was where "Hold "The Fort" business came in. Sherman's signal to Gen Corse was "Hold on to Allatoona I will help you." I am quite sure these are the facts words. -

Oct 15/64 - I think it should be Ouotenaula or Oostenaula - not sure which. but think that it is Oostanaula. - After taking Savannah

Sherman telegraphed Lincoln
"I have the honor to present to you
"as a Christmas gift the City of Savannah
"with — guns and — bales of cotton"
I can recall the number of guns or bales of
cotton, - I think you have done wonders in
getting data representing it in such attractive
form -
My own thing it seems to me should have
been from the photo I sent you, as it is as
I look now & nearly all the others boys of the
war period as of the present - The one published
of me was taken in 1869-70 - So it don't look as
the boys knew me, or as any but familiar
friends ever saw me. -
When will the book be out?
In what No of "Connoisseur" will a part
appear?
Am going to make my old Wounds Companion
& trout friend ante up a "V" for the work
when completed. -
I have a diary somewhere - not continuous
or full, but I jotted down incidents from
time to time & some would be of interest
I think - But I don't know where in the
mischief it is - Would any of it be of use
if found soon? -
A mighty good looking lot of men
are those depicted in the Souvenir, if I do
say as should'nt. -
I was thinking the other night

of the crossing or ascent of Sand Mountain.
Do you remember how it was done in the
night. + how the mountain was so steep that
the mules + horses were unhitched + ropes
were tied to the wagons + guns + the men,
catching hold of rappling + praying their
toes in the sand or bracing behind a rock
assembled up the steep, shouting the
by the light of the flaming torches first
guns + wagons, ankle + knee deep, until + last
fainting?

Well as you see Dr. Shaw in
Washington was called in from the field with
about 60 others - Dont know what will
happen next may get the G. B - but am not
going to worry - Get just about enough to
live on but can't go a fishing any more.
Hope you are all well -
Bessie joins in love to all
Your Comrade
J. R. Adams
