C. W. Bowyer.

Dear Sir.

As a close reader of the press of today and the Intercean in particular, and your articles among the first. I begin to see through the admission of such articles as you write that the press and old party men are beginning to see that all is not well with the people.

There is much of truth and of valuable suggestion in your contributions but pardon me if I say some error and no promise of sufficient remedy for our ills. At the present I wish only to call to your attention an error so palpable to many which occurs in your article of the 22d June.

I send the clipping instead of copying. With trusts formed to restrict production in every important line of manufactures. What can you mean by "Unrestricted competition" producing "universal over-production." Bosh. Talk! True only of farm products. Nowhere else true. Wake up friend to the great fact that is stalking abroad everywhere that this

closing of mills and what you call over production is every bit of it due to under consumption. Not one family in fifty is consuming what it's best paid demands in food clothing books and the like. — — financial crisis and numerous rats of interest and what it costs to make millionaires and pay transportation on R.R.'s that are capitalized at three times their cost and watered stocks in every line of manufactures on which dividends must be paid whether labor is suitably rewarded or not all this eats out the vitals of the great consuming class and they can't buy half what the most brave under consumption producing what you call over production from unrestricted competition. For God's sake man open your eyes and go on an expedition of discovery and

Get at the facts that are destroying us.
What are the remedies for this? Do?
I see none mentioned in your articles
so far!! I am paying interest today
on $7000 at an ave. 12% making
$840 per annum out of my toil to
enrich the banking system. Now
Albion Tompkins let us abolish
this damnable usurious system
and let us get our money out
of a subtreasury system - at no
cost except just enough to pay
cost of maintaining it, and save
me at least $800 of this amount
to buy clothing, fuel, machinery -
as I am a farmer - books - and
education for my family, build
houses and barns. By God how
things would change. In year by
year this load could be lifted
and those hundreds and many
thousands in a life time could
be saved to purchase comforts for my

myself and family. If the government will make the money and then accept various securities as it does the bankers are better. Why are we called buy and buy - and then are not half factories enough in the land to make what we would consume—

Let the entire banking system be abolished. and money be made free as air. and given out to the people direct on securities such as the national banks. by laws made by congress. are authorized to accept— and the government will be secure—

Of course I know the cry is that cheap money means bankruptcy sooner or later. That is true only so long as money is regarded as capital But you destroy the idea of capital in money by robbing it of its interest value. and then. like pounds and ounces and yard sticks. its use cannot bankrupt anything.

You are a republican. and are trying to save your party by warning it of some of the signs of danger. patriot to

no all- Have you any idea that a free silver plank will survive, No? Will a compromise between a gold and half way silver basis do it? No Will the old tariff tin pan ticket to the campaign dogs tail to fool the dear people get over once more do it? No. The democrats giving the tariff a little twitch down and the Republicans would give it a little yank- just a little yank up you know and that would cure us. What do you say we can hope for if we vote this or that or the other? Is the no light- its just awful dark these days. I see nothing but a reign of Anarchy- ahead. Half my farmer neighbors are ready now to take up arms against the existing condition of things. Some have already got their arms and ammunition. Others will buy soon if there is no show of a hand to smash the money combinations by leaders of the great parties soon. It may all burst out in flame any moment. Come speak out boldly. Yours A J Mansfield Kolbe Su-
