NEW YORK STATE SEWER PIPE CO.

MANUFACTURERS OF VITRIFIED SEWER PIPE.

OFFICE 8 CALEDONIA AVENUE.

Rochester, N. Y., July, 20th, 1895. 189

Mr. A. W. Tourgee,

Mayville, N. Y.

Dear sir:- We have yours of the 17th inst., to the Buffalo Sewer Pipe Company, and in answer to your questions, would say:- First, - Vitrified Pipe are glazed, and made in two-foot lenghts, except upon special orders, when we can make them in any lenght, three-Ft. being the extreme.

They are round, with or without sockets. Our catalogue, which we enclose under separate cover, will show you the shapes, etc.

We do not understand what you mean by "Square at the ends, and without any swell or flange." If you mean a round pipe, without socket, similar to Rong Pipe, as shown on page #12 of our catalogue, we can furnish this kind of pipe at 65% off list, as shown on page #4 of catalogue enclosed, f.o.b.cars at factory, with freight allowed on carload lots.

We keep in stock 12" 15" and 18" Ring Pipe, 3-Ft.lenghts, and any other lenghts we can make to order. The same discount will apply on the 2-Ft.lenghts, but for the Ft., half-foot, and Quarter-Ft. lenghts, we should be obliged to make a little less discount.

Any other inquiries we shall be very happy to answer.

Yours truly, New York State Sewer Pipe Co.

Gen'l Manager.
